TRAININGS

Deep Learning

Coursera, Online

Jun 2023 - Present

Deep learning, which falls under the category of machine learning, employs neural networks that consist of numerous hidden layers to autonomously identify complex patterns and representations from data. Its ability to excel in tasks such as image and speech recognition has led to significant advancements in areas like computer vision and natural language processing. The scalability, flexibility, and outstanding performance of deep learning on intricate datasets have established it as a prominent and revolutionary technology.
